

PREFACE

What does it mean to belong to a community? How is membership conceptualised and how is it construed in actuality? In what way are the position of outsiders negotiated and the cohesion of a community secured? These questions touch upon some complex and important issues that are often focus of public debate. Surprisingly, they are rarely tackled explicitly by those working on Athenian society – often it is implicitly assumed that political participation was the dominant aspect defining insiders (citizens) from outsiders (non-citizens). This book, however, derives from the notion that the Athenian *polis* should not be understood as a city-state run by legally privileged and politically active men, but should rather be approached as a social community consisting of the people who on account of their Athenian descent were expected to participate in all aspects of *polis* life, in that way collectively securing the well-being of the group.

From fragments of Pericles' famous citizenship law of 451/0 we know that from that year onwards only those born of two citizen parents would count as citizens. Unfortunately, no clear definition of what this Athenian citizenship entailed survives from classical Athens. Still, in many ancient sources we find the statement that membership of the Athenian *polis* consisted of active participation in the public life of the Athenian community, of sharing in the *polis* (μετέχειν τῆς πόλεως), often further specified as sharing in the religious obligations of the *polis* (μετέχειν τῶν ἱερῶν καὶ τῶν ὁσίων). In these sources the Athenian *polis* is, in short, presented as a participatory community, membership of which consisted of active participation in the *polis*, perhaps most importantly in *polis* religion. From that view it becomes interesting, not to say necessary, to reconsider the position of a particularly prominent and important group in the Athenian *polis*, namely free foreign residents, who in the course of the fifth century were gradually included in the public life of the *polis* as 'metics', most notably in Athenian *polis* religion, and who on that account should, at least to a degree, be considered members of the *polis*.

Exploring this notion of the Athenian *polis* as a religious and participatory community – which to some extent has already been proposed for archaic Attica by several, mostly French structuralist scholars – the main thesis of this book, which deals with the position of immigrants in classical Athens, is twofold. First it proposes that by including a group in their official rites the Athenians were incorporating that group into their *polis* community and displaying and reaffirming that incorporation and therewith the sustained cohesion of the entire group on a regular basis. Although the unifying features of a shared religious system are commonly embraced, the ramifications are only rarely fully appreciated by those dealing with the Athenian *polis*. I argue that by including free foreign residents as metics in several *polis* rites these metics were accepted as members of the Athenian *polis* community

– although they could, of course, never become full members, which was ultimately based on descent, except by a grant of citizenship.

Secondly, it is argued that by stipulating differences in participation, in this case in the context of *polis* religion, the Athenian *demos* could differentiate social groupings from and in connection to each other. By stipulating, for instance, differences in the portions of sacrificial meat allotted or dress codes, what groups were included in or excluded from certain festival events, the order of participants in a procession, *et cetera*, a variety of *polis* memberships could be defined and displayed in public, each with its specific qualifications and specific roles to play in the *polis*. Ritual differentiation was thus instrumental in the carving out, displaying and (re)affirming of the constituent parts of the *polis* and the (re)creation of identities and hierarchies. Combining these two strands, this book deals in detail with how the differentiated participation of immigrants in several aspects of Athenian *polis* religion resulted in 1) the gradual incorporation of this group into the Athenian *polis* community and 2) the on-going articulation of a separate metic status in relation to the other members of the *polis*. In this way, I hope to arrive at a better understanding both of the Athenian *polis* as a religious and participatory community and of the ways in which the *demos* conceptualised a status for the immigrants in their midst.

I feel very fortunate to have been given the opportunity to work in the context of the project on ‘Citizenship in classical Athens’ at Utrecht University, with project leader Josine Blok and funded by The Dutch Research Council (NWO), and of which this book is one of its many offsprings. Two persons have been particularly important in that context for their support, comments, and discussions: Josine Blok and Stephen Lambert. In Utrecht I furthermore felt greatly supported by my direct colleagues, Floris van den Eijnde and Lina van ’t Wout, and later Saskia Peels, who were all working on the same project. Combining the perspectives of an archaeologist, philologists, ancient historians and an epigraphist, we came to sharpen our views on the social role of religion in ancient Attica in a unique way. In addition, I want to thank my current colleagues at the University of Groningen (The Netherlands), and in particular Onno van Nijf and Babette Hellemans, who both in their own way have always greatly supported me in continuing my research on *μετοικία*, and on the dynamics of the ancient Athenian community in general. For this book, the critical observations of Nick Fisher and *Historia*’s anonymous readers of my manuscript were also highly beneficial. Finally, for always supporting me on my academic path in any way possible, I want to thank Anke Muilenburg, Tiemen Rozboom, and my *exemplum* in academia ever since I was little, Leen Spruit. Wrapping up this preface, I want to remind the reader that any remaining errors, whether typos or wanderings in the woods, are my own.

Referring to Greek names and terms I follow the common Latin transliterations and use those versions as can be found in the ninth edition of Liddell and Scott’s *Lexicon*. Only with less familiar persons, found, for instance, in the many inscriptions discussed in this book, I use a more literal transcription of their Greek names. All

translations of literary texts derive from the Loeb series, except where it is stated otherwise. The translations of the epigraphical material are my own, except where it is stated otherwise.

Sara Wijma

INTRODUCTION: DEFINING *POLIS* MEMBERSHIP

Si l'on veut donner la définition exacte du
citoyen, il faut dire que c'est l'homme qui a la
religion de la cité

Fustel de Coulanges, *La cité antique* (1864)¹

DEFINING THE *POLIS* AND ITS MEMBERS: A NEW PARADIGM

Since the nineteenth century the classical Athenian *polis* has most often been equated with its democratic constitution and the adult male Athenians who, based on their Athenian descent, had the right to spend their days on the Pnyx, in the courts or on the battlefield. As a consequence of this institutional and predominantly political perspective, modern scholars usually exclude all those who were not male, not adult, or not Athenian from the *polis* community. Women, slaves, children, and immigrants – in most modern accounts of the *polis* they are silenced, kept indoors, or never let in. At best, these outsiders had to some degree facilitated the rise of Athenian democracy and supremacy by reducing the citizens' workload and by representing the ever so useful 'others' against which the image of a male elite club could be articulated.² In short, the world of the *polis* was the world of the *polites*, the male Athenian citizen, who received his citizen status at birth and several concomitant rights at the age of eighteen and whose main and defining concerns were with running and protecting the *polis*.

Influenced by the modern, liberal interpretation of citizenship as a privileged juridical status protecting the individual against a malignant state – and perhaps also by the derivation of our word 'politics' from the Greek word πόλις – this political view of the *polis* and its members is eagerly supported by referring to Aristotle's Πολιτικά (literally 'Things concerning the *polis*') 1275a-1278b, where the philosopher tries to give a definition of the full members of the Greek *poleis*, the πολῖται – a daunting task, as 'people do not all agree that the same person is a citizen' (1275a). Typically, Aristotle first establishes several criteria that, in his eyes,

- 2 E.g. P. Cartledge, *The Greeks; a portrait of self and others* (Oxford 1993); B. Cohen (ed.), *Not the classical ideal; Athens and the construction of the Other in Greek art* (Leiden 2000); E. E. Cohen, *The Athenian nation* (Princeton 2000) 5–6, with n.8. Cf. R. W. Wallace, 'Integrating Athens, 463–431 BC' in: G. Herman (ed.), *Stability and crisis in the Athenian democracy (Historia Einzelschriften 220)* (Stuttgart 2011) 31–44, esp. 32–4.

can *not* be used to define a πολίτης, like place of domicile or sharing a common system of justice. As ambiguity concerning the division of political offices was the main cause of contention among those living in the *polis*, resulting in *stasis* in many cases, Aristotle states that (ideally) ‘a citizen pure and simple is defined by nothing else so much as by his participation in judicial functions and in political office’ (πολίτης δ’ ἀπλῶς οὐδενὶ τῶν ἄλλων ὀρίζεται μᾶλλον ἢ τῷ μετέχειν κρίσεως καὶ ἀρχῆς- 1275a). It is not difficult to see how this definition leads to the political interpretations of *polis* and citizenship that are commonly found in our textbooks and reference works.³

In the past decades, however, several scholars have expressed a growing discomfort with the understanding of the *polis* as a political community and with the modern tendency to uncritically apply Aristotle’s theoretical model to the classical (Athenian) *polis*.⁴ In an important article promoting ‘a new paradigm of Athenian citizenship’ Philip Brook Manville convincingly questioned whether Athenian citizenship was really such a clearly defined juridical status representing individual rights that were aimed to protect the individual against an impersonal “state”, and whether we are correct in understanding the *polis* and Athenian citizenship primarily through institutional and political contexts.⁵ The *polis* and its members were usually not as neatly defined as Aristotle presents it to be – even Aristotle implicitly admits to this. As Edward Cohen has argued a bit too fervently: the lines between the different inhabitants of the Athenian “nation” were not as sharply drawn according to a fixed set of (juridical) criteria as we believe or want them to be.⁶ In fact, it seems to have been this characteristic fuzziness of the Greek *polis* communities, ultimately defying a comprehensive definition, which Aristotle was trying to tackle.

Do we, moreover, not all by now accept that there was no independent legal entity in classical Athens similar to our modern concept of ‘state’ against which the individual citizen should be protected by the conferral of certain unalienable rights? Are we not too much arguing from our own liberal (or Marxist) ideas of state and citizenship, finding a reassuringly familiar definition in Aristotle’s philosophical

- 6 Cohen, *Athenian nation* (2000) *passim*. Cf. Manville (1994) 22–3; W. R. Connor, ‘The problem of Athenian civic identity’ in: A. L. Boegehold and A. C. Scafuro (eds.), *Athenian identity and civic ideology* (Baltimore and London 1994) 38–41. One of the main flaws of Cohen’s thesis is that, although he convincingly emphasises the heterogeneity of Attic society, he fails to offer an alternative model based on which social distinctions in Attica were in fact commonly conceptualised, cf. R. Osborne, ‘Review of *The Athenian nation* by Edward E. Cohen’, *CP(h)* 97 (2002) 93–8. See K. Vlassopoulos, ‘Free spaces; identity, experience and democracy in classical Athens’, *CQ* n.s. 57 (2007) 33–52, for such an alternative model.

work? In fact, the concept of rights was completely alien to the Greek *poleis*. Instead, Aristotle and many before him refer to ‘sharing in’ and ‘participating in’ (μετέχειν) or ‘being in a position to’ (ἐξείναι) when describing the status of citizenship, a status which one did not possess but embodied.⁷ Furthermore, the *polis* was not an entity separate from its citizens. It was above all a social organisation consisting of the *politai*, who, based on their Athenian descent and acceptance by the community, formed a collective of free Athenians, who equally shared in the corporate entity that was the *polis* according to the expectations of the group.⁸ A corporate identity, moreover, that should be studied with an eye for the intertwinement of the political not only with the military and the juridical but also with the economical, the social and the religious. In fact, the application of such a separation of spheres to pre-modern societies in general is now seen as wholly anachronistic and to study the *polis* only from a political perspective therefore leads to an anachronistic and at best partial understanding. According to Manville, we should accordingly rid ourselves of our modern obsession with legal definitions and politics and return to the broader context of politics in the Greek sense of the word as ‘the world of the *polis*’.⁹

Significantly, the difference between the ‘old’ abstract, political paradigm and the more organic or integrated one proposed by Manville and others is mirrored in the discrepancy between Aristotle’s definition of citizenship and the realities of the (Athenian) *polis*. No one would argue that similar to metics and children, as Aristotle states, ‘the old men who have been discharged [i.e. of military service] must be pronounced to be citizens in a sense, yet not quite absolutely’ (*Pol.* 1275a). Athenian old men were generally not perceived or described as an inferior category of semi-citizens. It would even be quite inappropriate not to include these often highly respected members among the *politai*.¹⁰ What is more, there is plenty of evidence indicating that Athenian women were considered *politai*, even though they were commonly excluded from participating in *krisis* and *arche*.¹¹ True, old men no longer fought on the battlefield and women did not deliberate in the *ekklēsia*, but, as Martin Ostwald argues, the *polis* had different expectations of each member and these old men and women were citizens in their own ways.¹² These discrepancies can be explained when we consider that Aristotle was interested in a functional definition of Greek citizenship that he could use for a political interpre-

Patterson, ‘Hai Attikai; the other Athenians’ in: M. Skinner (ed.), *Rescuing Creusa; new methodological approaches to women in antiquity* (*Helios* 13/2)(Austin 1986) 49–68.

12 Ostwald (1996) 56–7.

tation of his ideal *polis*. The gap between his theoretical interpretation and the notions of his contemporaries in fact returns in Aristotle's twofold use of the term '*polis*', as Josh Ober observed. For Aristotle seems to have used '*polis*' not only to denote a community of political animals¹³ but also to describe the social community living on its territory, which included many people who Aristotle did not strictly consider to be citizens.¹⁴ This signals a tension between Aristotle's theoretical ideas and the realities of his time.

SHARING IN THE *POLIS*

But what, then, were the realities of Aristotle's time, or rather of the Athenian *polis* in the classical period, for which we have by far most evidence? Many court cases involving someone's claims to citizenship demonstrate that the Athenians considered their *polis* to be a participatory community in which membership 1) was based on (the public acceptance of) Athenian descent – originally from one Athenian parent and after Pericles' citizenship laws of 451/0 from two – and 2) consisted of sharing not only in *krisis* and *arche* but in the *polis* at large (μετέχειν τῆς πόλεως). For instance, Demosthenes could remind the Athenian jurors that they were the ones who had granted Athenian citizenship to a certain Charidemos 'and by that gift bestowed him a share in our *hiera*, our *hosia*, our laws, and everything else in which we ourselves participate' (καὶ ἱερῶν καὶ ὀσίων καὶ νομίμων καὶ πάντων ὧν περ' αὐτοῖς μέτεστιν ἡμῖν – 23.65). Similarly, in his *Speech against Neaera*, Apollodorus expresses his indignation about Stephanus, whose wife, the *hetaera* Neaera, and daughter Phano had both been participating in several ancestral Athenian rites that were open only to Athenian *politai*, with the following words:

καίτοι πῶς οὐκ οἴεσθε δεινὸν εἶναι, εἰ τοὺς μὲν φύσει πολίτας καὶ γνησίως μετέχοντας τῆς πόλεως ἀπεστέρηκε τῆς παρορησίας Στέφανος οὐτοσί, τοὺς δὲ μηδὲν προσήκοντας βιάζεται Ἀθηναίους εἶναι παρὰ πάντας τοὺς νόμους;

Do you not consider it a monstrous thing, that this Stephanus has taken the right of free speech from those who are legitimate citizens by birth, who share in the *polis*, and in defiance of all the laws forces upon you as Athenians those who have no such right? ([Dem.] 59.28)

To contrast the monstrosity in the act that Neaera and Phano had shared in some of the most sacred rites of the Athenians despite their non-citizen status, Apollodorus "quotes" an Athenian decree by which a group of Plataean refugees had been

- 13 'Man is a political animal' is a phrase seen as quintessentially Aristotelean but it is in fact a mistranslation of ὁ ἄνθρωπος φύσει πολιτικὸν ζῷον (Arist. *Pol.* 1253a), literally 'man is by nature a creature of the polis'.
- 14 J. Ober, 'The polis as a society; Aristotle, John Rawls, and the Athenian social contract' in: idem (ed.), *The Athenian revolution; essays on ancient Greek democracy and political theory* (Princeton 1996) 107–22. Cf. Blok (2005) 31–5, who terms Aristotle's more inclusive polis the 'socio-polis'. Also see the more general and still largely politically oriented discussion on the various meanings of the word 'polis' in M. H. Hansen (ed.), *The return of the polis; the use and meanings of the word polis in archaic and classical sources (Historia Einzelschriften 198)* (Stuttgart 2007).

granted citizenship in 427 after their city had been sacked by the Spartans and Thebans.¹⁵ According to the orator this grant included the statement that

Πλαταιεᾶς εἶναι Ἀθηναίους ἀπὸ τῆσδε τῆς ἡμέρας, ἐπιτίμους καθάπερ οἱ ἄλλοι Ἀθηναῖοι, καὶ μετεῖναι αὐτοῖς ὥσπερ Ἀθηναῖοι μέτεστι πάντων, καὶ ἱερῶν καὶ ὀσίων

“the Plataeans shall be Athenians from this day onwards, and shall have the same honours/shares as the other Athenians, and shall share in everything in which the Athenians share, both in the *hiera* and the *hosia*”. ([Dem.] 59.104)¹⁶

At least in the fourth century, then, Athenian citizenship could be described in terms of sharing (μετέχοντας; μετεῖναι; μέτεστι) in the common activities and goods of the *polis*. What is of great significance here, as Josine Blok has probably pointed out most clearly¹⁷, is the fact that this active participation in the *polis* is often specified as μετέχειν τῶν ἱερῶν καὶ τῶν ὀσίων, as sharing in the *hiera* and the *hosia* of the Athenians.¹⁸ The plural noun ἱερὰ can be translated as ‘the things belonging (or being offered) to the gods’, which meant both the things in their possession, like shrines and treasures, and the things humans customarily owed the gods that were consecrated in a gift-giving process, most importantly in the form of (animal) sacrifice. But other offerings like votive statues and more ephemeral gifts like processions, athletic competitions and choruses were also considered ἱερὰ.¹⁹ The plural noun ὅσια is less straightforward, though, as W.R. Connor has convincingly argued, in general the term seems to always possess positive connotations and roughly means ‘the things concerning a good order between gods and humans and among humans that is pleasing to the gods’.²⁰ Ὅσια consequently encompasses both laws concerning human behaviour towards other humans and so-called “sacred” laws, governing human behaviour towards the gods.²¹

15 For this grant and its controversial authenticity see most importantly: M. J. Osborne, *Naturalization in Athens II: Commentaries on the decrees granting citizenship* (Brussels 1982) 28, no. D1; K. Kapparis, ‘The Athenian decree for the naturalisation of the Plataeans’, *GRBS* 36 (1995) 359–81; M. Canevaro, ‘The decree awarding citizenship to the Plataeans ([Dem.] 59.104)’, *GRBS* 50 (2010) 337–369.

16 The translation is my own.

19 That choruses were considered gifts to the gods and thus *hieros* can be inferred from two oracular responses cited by Demosthenes in his *Speech against Meidias* (21.52–53). Demosthenes also takes the opportunity to stress the impiety (ἀσέβεια) of Meidias’ act of tampering with his chorus (21.51).

20 Connor (1988) *passim*. For a summary of the debate and bibliography: J.H. Blok, ‘Democritus and the meaning of *hosios* money in fifth-century Athens’, *Mnemosyne* 63 (2010) 62–4.

21 On “sacred laws”: R. Parker, ‘What are sacred laws?’ in: E. M. Harris and L. Rubinstein (eds.), *The law and the courts in ancient Athens* (London 2004) 57–70; E. Lupu, *Greek sacred law; a collection of new documents* (Leiden 2005) 3–112.

Following Blok, it can thus be stated that being an Athenian citizen meant that one was to share in the rites of the Athenian *polis* in a proper and often prescribed, ancestral way in order to secure divine support for the community. By that same token, being an outsider to the Athenian community or becoming one because of unacceptable behaviour resulted in the exclusion from the rites of the Athenians. Foreigners (*xenoi*) were automatically excluded – although they could be present as spectators.²² In Apollodorus it is claimed that Athenian women will be angry at the jury if they acquit the foreign Neaera, ‘having it deemed right that this woman should share in like manner with themselves in the public ceremonials and religious rites’ ([Dem.] 59.11). In Demosthenes’ *Speech against Euboulides*, delivered shortly after the general revision of deme registers in 346/5, Euxitheus claims to be on the side of the defendant, the demarch Euboulides, for having rid the deme registers of foreigners who had passed as citizens (though he naturally does not agree with being struck of the records himself):

ἐγὼ γὰρ οἶμαι δεῖν ὑμᾶς τοῖς μὲν ἐξελεγχομένοις ξένοις οὖσιν χαλεπαίνειν, εἰ μῆτε πείσαντες μῆτε δεηθέντες ὑμῶν λάθρα καὶ βία τῶν ὑμετέρων ἱερῶν καὶ κοινῶν μετείχον, τοῖς δ’ ἠτυχηκόσι καὶ δεικνύουσι πολίτας ὄντας αὐτοὺς βοηθεῖν καὶ σῶζειν

I am of the opinion you should be angry with proven *xenoi* if they, without consent or without asking for it, have shared in our *hiera* and *koina*, with slyness and force and bring help and deliverance to those who have met with misfortune and can prove that they are citizens. (57.3)

But not only *xenoi* were excluded from sharing in the *hiera* of the Athenian *polis*. In perfect opposition to grants of Athenian citizenship including the clause that new citizens would share in the *hiera* and *hosia* of the Athenians, Athenian citizens who had betrayed their citizen status because of inappropriate behaviour (*atimoi*) were excluded from the common rites. So, in the *Speech against Neaera* it is stated that adulterers were excluded from the *hiera* of the Athenians ([Dem.] 59.86). In *On the Mysteries*, Andocides refers to the law of Isotimides that aimed ‘to exclude from the *hiera* all who had committed an act of impiety’ (1.71).²³ It should come as no sur-

22 E.g. [Dem.] 59.73–76; 85. On this topic see P.A. Butz, ‘Prohibitory inscriptions, Ξένοι, and the influence of the early Greek polis’ in: R. Hägg (ed.), *The role of religion in the early Greek polis* (Stockholm 1996) 75–95; P. Funke, ‘Fremde und nicht-Bürger in den griechischen Heiligtümern der antiken Mittelmeerwelt; ein historische Einführung’ in: A. Naso (ed.), *Stranieri e non cittadini nei santuari Greci* (Firenze 2006) 1–12. Similar rules applied in Panhellenic sanctuaries concerning the exclusion of unruly persons and *barbaroi*: C. Sourvinou-Inwood, ‘What is polis religion?’ in: O. Murray and S. Price (eds.), *The Greek city from Homer to Alexander* (Oxford 1990), reprinted in R. Buxton (ed.), *Oxford readings in Greek religion* (Oxford 2000) 13–8; H. Bowden, *Classical Athens and the Delphic oracle; divination and democracy* (Cambridge 2005) 21. For an extensive and nuanced discussion of the source material relating to the exclusivity of Greek religion in Hellenistic times: S. Krauter, *Bürgerrecht und Kulturteilnahme; politische und kultische Rechte und Pflichten un griechischen Poleis, Rom un antikem Judentum* (Berlin and New York 2004) esp. 53–108.

23 In this speech, Andocides refers to another instance of unacceptable behaviour leading to the exclusion from one of the most important religious sites of Attica: ‘Should Cephisius here [...] fail to gain one-fifth of the votes and so be subject to *atimia*, he is forbidden to enter the temple of the Two Goddesses [i.e. in Eleusis] under pain of death’ (1.33). Cf. Lycurg. 1.5. On *atimia* as a claim for a public discussion of someone’s social status: P.E. van ’t Wout, ‘Harbouring
