

## CONTENTS

|   |    |
|---|----|
| Preface .....   | 9  |
| 1. ASTRONOMY IN THE <i>REPUBLIC</i>   |    |
| 1.1. Introduction .....   | 11 |
| 1.2. The two astronomies in <i>R. 7</i> .....                                 | 19 |
| 1.3. The contemporary astronomy familiar to Glaucon .....                     | 21 |
| 1.3.1. Introduction .....   | 21 |
| 1.3.2. The fixed-star phases .....  | 23 |
| 1.3.3. The theory of the fixed-star phases .....                              | 26 |
| 1.4. The hypotheses of contemporary astronomy .....                           | 30 |
| 1.5. The criticism of contemporary astronomy .....                            | 34 |
| 1.5.1. Why is contemporary astronomy mired in the sensible world? .....       | 34 |
| 1.5.2. Arithmetical interlude .....   | 36 |
| 1.5.3. Archytas of Tarentum .....   | 44 |
| 1.6. The future astronomy envisioned by Socrates .....                        | 46 |
| 1.6.1. The hypotheses of the future astronomy .....                           | 46 |
| 1.6.2. Celestial motions in the hypotheses of the future astronomy .....      | 51 |
| 1.7. The future astronomy and solid geometry .....                            | 56 |
| 1.7.1. The problem of cube-duplication .....                                  | 56 |
| 1.7.2. Archytas' solution .....   | 60 |
| 1.7.3. Menaechmus' solution .....   | 61 |
| 1.7.4. Eudoxus' solution and his theory of homocentric spheres .....          | 62 |
| 1.7.5. Future astronomy, stereometry and the theory of homocentric spheres .. | 66 |
| 2. THE UNITY OF MATHEMATICS IN THE <i>REPUBLIC</i>                            |    |
| 2.1. Introduction .....   | 71 |
| 2.2. Arithmetic as unifier of mathematics .....                               | 74 |
| 2.2.1. The superiority of arithmetic and incommensurability .....             | 74 |
| 2.2.2. Incommensurability and the future astronomy in <i>R. 7</i> .....       | 77 |
| 2.2.3. Incommensurability in the divided-line simile .....                    | 79 |
| 2.2.4. Philip of Opus .....   | 80 |
| 2.3. Proportion-theory as unifier of mathematics .....                        | 82 |
| 2.4. Mutual benefit as unifier of mathematics .....                           | 83 |
| 2.5. The unity of soul and Callipolis as mutual benefit of their parts .....  | 86 |
| 2.6. The unity of mathematics and the <i>Meno</i> .....                       | 90 |
| 2.7. Two modern mathematicians on the unity of mathematics .....              | 94 |
| 2.8. Albert Lautman on the unity of mathematics .....                         | 95 |
| 2.9. Mathematics and philosophy .....   | 98 |

### 3. THE MYTH ABOUT PLATO'S ROLE IN THE DEVELOPMENT OF MATHEMATICS

|          |   |     |
|----------|---|-----|
| 3.1.     | Plato's role in the development of astronomy .....              | 103 |
| 3.2.     | The tradition of the Delian problem and its sources .....       | 109 |
| 3.2.1.   | The main testimonies .....                                      | 109 |
| 3.2.2.   | The generative principle of the tradition .....                 | 111 |
| 3.2.3.   | Evidence for the application of this principle in Theon .....   | 113 |
| 3.2.4.   | The sources of the tradition in the Platonic corpus .....       | 115 |
| 3.2.4.a. | <i>Meno</i> .....   | 115 |
| 3.2.4.b. | <i>Laws 7</i> .....   | 116 |
| 3.2.4.c. | <i>Epinomis</i> .....   | 117 |
| 3.2.4.d. | <i>Republic 7</i> .....   | 119 |
| 3.2.4.e. | <i>Timaeus</i> .....  | 120 |
| 3.3.     | The sources of the myth about Plato's impact on astronomy ..... | 120 |
| 3.3.1.   | <i>Laws 7</i> .....   | 120 |
| 3.3.2.   | <i>Laws 1</i> .....   | 124 |
|          | Bibliography .....  | 132 |
|          | Index of passages .....   | 136 |
