

CONTENTS

1. INTRODUCTION	13
1.1 Institutions in a regional economic growth model	14
1.2 A Chinese success story: the Greater Pearl River Delta	16
1.3 Toward a new economic growth model?	19
1.4 Aim and scope	20
1.5 Acknowledgements	23
2. THEORETICAL AND CONCEPTUAL BACKGROUND	25
2.1 Institutional change and the regional economy	25
2.1.1 Institutions in an interdisciplinary perspective	25
2.1.2 The process of institutional change	27
2.1.3 The role of informality in the process of institutional change	31
2.1.4 The role of institutions during China's economic reform	32
2.1.5 Spatial perspective to institutional analysis and change	36
2.1.6 Institutions and regional economic resilience	36
2.1.7 Interim conclusion	38
2.2 Innovation and industrial upgrading in China	38
2.2.1 Information, learning, and innovation in an organizational perspective	39
2.2.2 Internal sources of knowledge	42
2.2.3 External sources of knowledge: The role of Global Value Chains and Foreign Direct Investment	43
2.2.4 The latecomer firm: Resource constraints and innovation strategies	49
2.2.5 Systems of innovation in China and the Pearl River Delta	52
2.2.6 Interim conclusion	55
2.3 Developing an analytical framework	56
2.3.1 Case study selection: The electronic industry	57
2.3.2 Analytical structure	59
2.3.3 The regulative dimension	60
2.3.4 The cultural-cognitive dimension	60
2.3.5 The institutional perspective on regional economic upgrading	62
3. METHODOLOGY	63
3.1 Empirical research data	63
3.1.1 Quantitative survey data (2011)	63
3.1.2 Quantitative survey data (2009)	66
3.1.3 Qualitative interviews	67
3.1.4 Secondary statistics	68
3.2 Measurement concepts	68
3.2.1 Measuring institutions	68

3.2.2 Measuring innovation	75
3.3 Critical method evaluation and limitations	76
4. INSTITUTIONAL CHANGE AND STRATEGIC ADAPTATION. A FIRM-LEVEL PERSPECTIVE ON THE POST-CRISIS ECONOMY OF THE CHINESE PRD	79
4.1 Introduction.....	79
4.2 Theoretical and conceptual background.....	81
4.2.1 Institutional change and organizational adaptation.....	81
4.2.2 Strategic responses to changing institutional environment in the PRD	84
4.3 Data and methods.....	86
4.4 Empirical analysis of firm adaptation processes.....	87
4.4.1 Changing environmental conditions in the PRD.....	87
4.4.2 Firms' strategic adaptation to changing environmental conditions	91
4.4.3 Compliance with institutional pressure – on-site adaptation	92
4.4.4 Balancing diverging interests.....	93
4.4.5 Bargaining favorable environmental conditions.....	97
4.5 Conclusion and discussion	100
5. THE IMPACT OF FINANCING CHANNELS ON FIRM INNOVATION – IS THERE AN 'INFORMALITY TRAP?'	103
5.1 Introduction.....	103
5.2 Theoretical and conceptual background.....	105
5.2.1 Sources of formal financial capital	105
5.2.2 Sources of informal financial capital	107
5.2.3 Institutional change and firm performance	109
5.2.4 Financial sources and firms' innovation activities.....	110
5.3 Data and methods.....	112
5.4 Finance and innovation in the electronics industry of the PRD.....	115
5.4.1 Utilization of financial capital.....	115
5.4.2 Financing sources and firm innovation.....	119
5.4.3 Informal financing in electronics manufacturing firms – are firms stuck in an 'informality trap'?	122
5.5 Conclusion	123
6. INTER-FIRM LEARNING IN THE ELECTRONICS SUPPLY CHAIN – PROSPECT FOR ENHANCING LOCAL FIRMS' INNOVATION PERFORMANCE?	126
6.1 Introduction.....	126
6.2 The process of innovation from a supply-chain perspective.....	129
6.2.1 Modes of learning and knowledge transfer.....	129

6.2.2 Institutional and moderating factors in the innovation process	130
6.3 Data and methods	133
6.4 Econometric analysis	136
6.4.1 Measuring knowledge exchange and innovation	136
6.4.2 Independent variables	138
6.4.3 Descriptive results	140
Characteristics of key-supplier relations (upstream-side)	140
6.4.4 Econometric models	141
6.5 Discussion	144
6.5.1 Information exchange	145
6.5.2 Innovation performance	146
6.5.3 Hypotheses and limitations	147
6.6 Conclusion	148
7. POLICIES OF RESTRUCTURING ECONOMIC GROWTH – TOWARDS A NEW GROWTH MODEL IN CHINA AND ITS PROVINCES?	150
7.1 Introduction	150
7.2 An institutional perspective on the Chinese political system	152
7.2.1 The Chinese development planning system in transition	152
7.2.2 Central-local relations and development planning	152
7.2.3 Personalized policy-making	154
7.2.4 Party bureaucracy, policy reform, and institutional change	155
7.3 Data and methods	157
7.4 The Chinese national growth model	158
7.4.1 Changes in the national economic policy orientation	159
7.4.2 Governmental redistribution: Revenue and expenditure perspective	162
7.4.3 Regional economic development trends	165
7.5 Political leadership and industrial development in Guangdong Province	168
7.5.1 Provincial economic policy orientation	168
7.5.2 Provincial economic development trends	171
7.5.3 Shift-share analysis	172
7.6 Interim conclusion	174
7.7 The future of economic growth in China	176
7.7.1 Quo vadis China?	176
7.7.2 Quo vadis Guangdong?	178
7.8 Conclusion	179
8. CONCLUSION	180
8.1 Answering the empirical research questions	180
8.2 The role of institutional factors for a new regional economic growth model	183
8.2.1 The firm dimension	184

8.2.2 The policy dimension.....	185
8.2.3 Regional (institutional) differences and future economic growth ..	186
8.3 Future research agenda.....	187
LIST OF REFERENCES.....	189
APPENDIX A: METHODOLOGY.....	209
A1: Shift-share analysis	209
A2: English translation of the questionnaire, 2011	210
A3: List of qualitative interviews, 2011.....	215
A4: Partial correlation-matrix of independent variables (chapter 5)	216
A5: Classification of product technology	217
APPENDIX B: DATA SOURCES.....	220
B1: Cartographic sources	220

LIST OF FIGURES

1.1	The Greater Pearl River Delta mega-urban region in Guangdong.....	15
1.2	Total Value of Imports and Exports in Guangdong Province (1987-2010).....	18
1.3	GDP-growth in China and Guangdong province (1998-2012).....	20
2.1	Levels of institutional analysis.....	30
2.2	Stylized Responses of a Regional Economy to a Major Shock.....	37
2.3	The process of organizational learning.....	41
2.4	The OEM to OBM cascade. Export-led learning in latecomer firms.....	50
2.5	Paths of Technological Capability Development.....	51
2.6	Industrial characteristics of the survey region.....	58
2.7	Conceptual framework for the empirical investigation.....	61
3.1	Structure of the utilized datasets for the emirical investigation.....	63
3.2	Selected institutional measurement in China and Hong Kong.....	69
3.3	Development of the CP index in China and Hong Kong.....	70
3.4	Quality of financial institutions in China and Hong Kong.....	70
3.5	Assessment of institutional quality in the PRD.....	72
3.6	Assessment of the importance of management Guanxi and informality.....	73
3.7	Assessment of the importance of governmental Guanxi.....	74
4.1	Strategic responses and firms'adaptation mechanism.....	83
4.2	Spatial patterns of partial relocation and firm expansion.....	95
4.3	Analytical framework.....	100
5.1	Overview of China's financial system.....	106
5.2	Key interest rate and loan-provision of Chinese financial institutions.....	108
5.3	Analytical framework.....	111
6.1	Example of production arrangements in the electronics supply-chain.....	127
6.2	Potential paths for industrial upgrading.....	133
7.1	The administrative structure of the PRC.....	154
7.2	Regional aggregates of China (left) and Guangdong province (right).....	158
7.3	Non-tax revenue in percent of total revenue.....	162
7.4	Governmental expenditure by poliy field as share of total expenditure.....	163
7.5	Fixed-asset investment in percent as share of total expenditure.....	164
7.6	Development of gross industrial output in China from 2002 to 2010.....	167
7.7	Development of gross industrial output in Guangdong Province.....	170
7.8	Shift-Share analysis of gross industrial output in Guangdong.....	173
8.1	Chinese Product Manufacturing Index 2005 to 2014.....	186

LIST OF TABLES

2.1	Mechanisms of knowledge transfer.....	45
3.1	Response rate according to firm location and contact mode.....	65
3.2	General characteristics of the surveyed firms	65
3.3	Comparison between sample and population based on firm size and ownership classification	66
4.1	Strategic responses to institutional processes.....	82
4.2	Monthly minimum wage in Guangdong province, Yuan RMB.....	88
4.3	Motivation for partial relocation and firm expansion	96
5.1	Central characteristics of company surveys in the PRD	113
5.2	Central characteristics of privately-owned firms by location	114
5.3	Utilization of financial sources by ownership in SZ and DG.....	116
5.4	Utilization of financial sources in Chinese domestic firms by location.....	117
5.5	Descriptive statistics of independent variables	119
5.6	OLS regression – Financing and innovation	120
6.1	Central characteristics of firms in regional differentiation	134
6.2	Industrial value-added in the survey region (2010).....	135
6.3	Descriptive statistics of independent variables	137
6.4	Characteristics of key-supplier and key-customer relations.....	139
6.5	Ordered logistic regression – Exchange of upgrading-related information	141
6.6	Ordered logistic regression – Improvements to products and processes....	143
7.1	Political leadership and policy orientation in the PRC.....	159
7.2	Compound annual growth rate of GOV by region in the PRC	165
7.3	Political leadership and policy orientation in Guangdong Province	168
7.4	Compound annual growth rate of GOV by region in Guangdong	172
